## Versatility Solutions

When used with different primers, Our Product can be applied to all common roof substrates (concrete, masonry, wood, tiles, PU foam, steel or others), covering tight spots and corners efficiently. The coating is so versatile it works perfectly well even on old roofs previously covered with tiles.

### General Application Guide

#### Open & Mix

Mix well with a paddle to ensure liquids and solids are all dispersed before application.

#### Surface Preparation

The substrate should be cleaned and dry and any dirt, oil, greases loose particles should be completely removed before application.

#### Application Thickness

Apply first coat @ 0.25 mm and when touch dry apply second coat @ 0.25 mm WFT.
